

To FCC about NAB's petition 04-160I respectfully urge the FCC to reject the above petition. Having satellite radio has been an improvement over what has been lacking or non performing local stations. In particular on traffic reports you may have to wait every 30 minutes for an update which means that is 29 minutes to late to avoid problems. The same goes for the weather reports. Also it is very boring to hear the same two or three stations with poor news coverage that is usually biased with that owner.

I do pay for my satellite radio and believe it is an asset to all out there.

Sincerely,

Richard E. Beazley
